

## CUSTOMER TESTIMONIALS

"The personal attention we receive from CPU Solutions is second-to-none. From component selection to customer service, CPU Solutions has outperformed every computer vendor we have ever worked with. Outstanding!"

Erik Muchka  
Full Compass

"CPU Solutions worked with us to design a cost efficient system controller for our Personal CNC products. They have exceeded our expectations for production and delivery, and helped to streamline our process. It's fantastic to have a local partner in Dane County with this level of support and communication."

Greg Jackson  
Tormach

"For our recent office upgrade, we compared CPU Solutions with the major mail-order system vendors. Both provided comparable systems at a comparable price, but there's no comparison on customer service. CPU Solutions' staff is knowledgeable, personable, and quick to respond to inquiries, whether for a \$10 cable or a \$1000 computer.

CPU Solutions worked with us to define two hardware configurations to maximize driver commonality, and even installed a custom drive image for us at no extra cost. We got more customization than a big vendor would offer, with much shorter lead times (about a week from order to build), and local support too. Our initial order went over so well that we've already purchased several additional batches of desktops."

Benjamin Davenport  
Extreme Engineering Solutions

"CPU Solutions has provided us high quality custom built computers backed by solid customer service. The friendly people and quick response of a local company has been exceedingly valuable over the years. A company I can truly rely on."
